HYPORTHYROIDISM

Tanya Burum Mendoza yes, mine is auto immune so a little different since my body is killing itself (thyroid) but it has helped with many of tje symptoms that i have/had

Lori Pennachia I never thought to even ask my dr. I have hypo and actually just had my meds adjusted before starting my shakes. I feels amazing and more energiozed then I have in a long time. AND I have lost 9 lbs in just under a month....not sure that answers your question at all but that's my story!

High Blood Pressure

CHRON'S

Carrine Molite's Customer suffers from crohn's and After her first week drinking shakeology she wrote this message...

"I just wanted to share with you that today is the first day that I woke up and felt "refreshed" in quite some time. I feel alive and have energy. I haven't felt this way since being on Humira. My tummy has been relatively settled. I just have joint pains, but the abdominal pains I SUFFER with have subsided substantially. The only thing I am doing all that different is Shakeo and so I have to credit it with this success. Before, I have always been too physically exhausted to exercise and the joint pain has been more than I can handle. Now, yes, I have pain, but the fatigue is managable. I am sure that the exercise is helping with that too, but again, I really have to credit Shakeo with this improvement because it has given me the lift to get the ball rolling. I am pretty excited to be me today:)"

LUPUS

I have lupus and I have been on plaquenil and prednisone for 22 years. I started shakeology in October 2013 and started feeling so great I stopped all my medications in January 2014. It is April 2014 and I am still off of my lupus meds and I still feel amazing! I have more energy than I have ever had and it is such a wonderful feeling to know I am off of medications that could be a detriment to my body but that I felt like I needed all these years. I love shakeology!-Deborah M Smith
